

TRX Profile Manager

Our broad array of profile management solutions gives corporations and agencies more access and control over traveler profile information than ever before.

PROFILE MANAGER

Manage traveler profile information conveniently and efficiently, giving travel managers greater control over their reports, and travelers greater control over their preferences, payment options and other travel criteria. Key features include:

- > **Managed Access** – Profile Manager gives travelers access to change personal information such as first name, last name, credit card information, travel preferences, as well as any custom information corporations wish to maintain. Corporate or travel managers can configure what users have the ability to view or change.
- > **Automated Updating** – Profile Manager allows travel agencies to have access to the most updated profile information for a traveler. Whether a corporate traveler logs into the customizable website to update their own information, or it is updated by a data feed, the changes are automatically updated in the GDS profile.
- > **Profile Management** – Profile Manager allows automatic updating of profile information in all the major GDSs, and can be used on its own or in conjunction with an online booking tool. In addition, it provides the ability to integrate with corporate ERP and HR systems.
- > **Powerful Administrative Capabilities** – With group profile updates travel managers can update entire user departments and have those changes reflected in their GDS profiles. Administrators can take advantage of the built-in data reporting, or customize their own reports to suit their own needs.

WEB SERVICES

TRX Web Services enables corporations and travel managers to create customized booking portals that leverage online booking technology for availability, purchasing and profile management. TRX Web Services offering is the best in the industry, and allows our clients to benefit from key third-party integrations, which provide access to supplier direct content, T&E spend management, meetings management solutions and more.

DATA BRIDGE & CUSTOM CONNECT

Databridge and Custom Connect offer custom tailored solutions to transfer data in any format and from any online booking application. Databridge provides structured data mapping protocols for both import and export of profile related information creating a central connection point for all of your profile needs. With Custom Connect, we leverage our robust profile technology to develop a scalable, customized profile management solution that meets your needs independent of any GDS or corporate booking solution.

EMPOWER . MANAGE . SAVE .

Let Profile Manager help you effectively manage your traveler profile requirements and generate significant savings and efficiencies for your travel program.
